SCOTT
CONNECTOR SYSTEM

VOI-SHAN MANUFACTURING COMPANY
A Division of Voi-Shan Industries, Inc.
8463 Higuera Street, Culver City, California

INTRODUCTION

In the interest of providing its customers with new concepts of standardized fitting hardware, VOI-SHAN INDUSTRIES presents "THE SCOTT CONNECTOR SYSTEM".

The SCOTT SYSTEM is designed to provide the industry with a new light-weight, versatile series of standardized connectors that are easily adapted to modular valves, restrictors, pressure switches, and to other fitting components.

VOI-SHAN INDUSTRIES invites your attention to the following features - - -

VOI-SHAN

SCOTT CONNECTOR SYSTEM

2000 Series -----

- * tested to MIL-F-18280 Specification
- * up to 75% weight saving over comparable connectors.
- * envelope adaptable to flared or flareless connections
- * supported insert eliminates cocking
- * insert chemically treated to aid electrical continuity
- * insert separated from threads - minimizes contamination of system fluids
- * nut designed to prevent cross-threading
- * single torque-up reduces installation time
- * envelope design facilitates structural clamping
- * flared sleeve designed to produce constant loading over entire length of flare

AVAILABLE IN:

aluminum

steel

titanium

flared

flareless

standard

bulkhead

1/4-inch thru 3-inch line size
